

## Subject

Human resource development on Aids to Navigation (AtoN)

## Objective

- To establish the AtoN Training Center in Viet Nam
- To train the AtoN professionals who can respond to current and future changes in water areas of the ASEAN region

## Back Ground

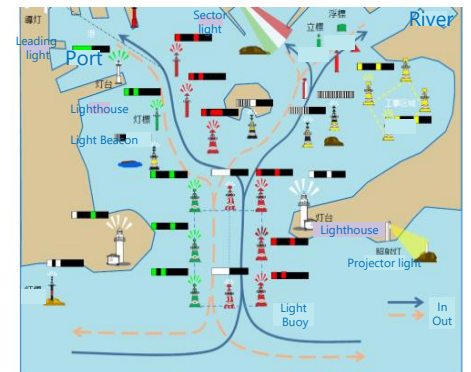

- The development of transportation infrastructure such as port, road, railroad, river, and airport has significantly changed logistics in the ASEAN region.
- Ports that serve as gateways for these logistics require maritime traffic safety through AtoN in accordance with port development.

## Training Image

Training location	An educational facility in Viet Nam
